

## SPRING 2017 PRE-PLANTING TRADE-IN PROGRAM

*Are you unhappy with your current 12volt motor control?*

*Are you looking for Dependability and Accuracy?*

Trade in ANY name brand, new or used, working or non-working 12 volt motor control and upgrade to C&R's new EMC150 Electric Motor Control.

Part #	Description	List Price	Your Price After Trade-In
505 040-0266	Console Only; w/ transducer EMC150	\$590.00	\$375.00
505 EMC150	Kit, EMC150 Console w/ Cables	\$650.00	\$400.00

C&R Supply is excited to announce our NEW 12 volt Electric Motor Control Console. We took the basic idea of a simple motor control and improved on it by creating a controller that automatically adjusts pump speed to compensate for pressure changes. Traditional controllers set the motor to remain at a fixed speed regardless of changes that may occur in the system (i.e. tank volume, changing viscosity etc). The EMC 150 controller automatically adjusts the pump output to maintain the desired pressure setting which results in more consistent application rates.

### IT'S TESTED

### IT'S DEPENDABLE

### IT'S ACCURATE

- **Automatic Pressure Compensation:** Quick, smooth pressure recovery to desired set point
- **Digital Pressure Readout:** Backlit for easy day or night visibility & references set point
- **Simple Install:** Simply connects into any 30amp 12v power source, and 12 volt "keyed" power source
- **Able To run Two Pumps:** Maximum of 30 Amps combined load
- **Easy Operation:** Press "master" to turn pump on, press ↓ ↑ to set desired pressure
- **Quality Stainless Steel Pressure Transducer**
- **Fuse Protection:** Fuse is in the in control box and has reverse polarity fuse protection
- **Tested & Dependable:** Each controller is tested prior to shipment
- **Durable:** Control box and all control buttons are water resistant & durable for long term use
- **Warranty:** Unit includes a 1 year warranty. **Made in the USA**
